

FOR IMMEDIATE RELEASE

AutoMobility Launches MyStart *Plus* GPS Fleet Tracking With No Monthly Fees.

Montreal, Quebec (October 16, 2018) - Montreal based AutoMobility expands the MyStart line, launches MyStart GPS. MS-GPS has all the features of the current MyStart *Plus* with the addition of: Real-time tracking, Speed alert, Hour meter, Maintenance reminders, Vehicle position history, Geofencing and Stop/Start alerts.

“We are very excited to launch this incredibly innovative product designed, engineered, and made in Canada on Otodata’s network, at a price point never seen before” said Robert Nelson, President of AutoMobility.

“In 2014, when we first launched Remote Start and convenience features, tracking and Fleet management was always in the plan, it is exciting to see the integration of both services in a small and very efficient product” said Andre Boulay, President of Otodata.

About AutoMobility:

AutoMobility is a full service Canadian mobile electronics company providing premier mobile electronic products to Canadian retailers and car dealers.

About OTODATA:

OTODATA is proprietary Québec-based data network providing stolen vehicle tracking and loss prevention in Québec and Ontario (www.otodata.ca).
